Professional Summary

Software Engineer with 2 years of experience building backend systems for business web applications. Experienced in designing APIs, implementing business-critical features, and integrating third-party services for e-commerce and sales platforms. Focused on delivering reliable, maintainable systems that solve real business problems and support product growth.

Technical Skills

Languages: Golang, PHP, Javascript, Typescript

Backend: Echo, Laravel, NestJS, NodeJS, ExpressJS

Frontend: ReactJS, VueJS

Databases: MySQL, PostgreSQL, Redis, MongoDB

DevOps: Git, Docker

Work Experience

Software Engineer, Miniapp - Ho Chi Minh City

Feb 2025 – May 2026

- Developed and maintained backend services for multiple Zalo Mini App projects, collaborating closely with frontend developers to deliver sales solutions for business customers.
- Designed and implemented a flexible product customization system supporting configurable topping combinations for beverage ordering applications.
- Built backend modules for the Việt Tiến ordering and SMS notification platform, integrating order processing with automated customer messaging workflows.
- Developed backend services for the Vihawa sales agent management platform and designed RESTful APIs to enable data synchronization with third-party systems.
- Implemented configurable promotional features, including "Buy X, Get Y" campaigns, allowing merchants to create flexible marketing programs without code changes.
- Integrated Sentry into production services for centralized error tracking and monitoring, enabling faster issue investigation and debugging.
- Investigated production issues through log analysis and customer feedback, delivering timely fixes and contributing to overall system stability.
- Technologies: Laravel, NestJS, ReactJS, MySQL, Docker.

Software Engineer, Lampart - Ho Chi Minh City

Feb 2024 – Jan 2025

- Participated in the development, maintenance, and optimization of multiple internal and commercial web projects for both domestic and international clients, including sales systems, internal chat applications, and project management platforms.
- Took responsibility as a Fullstack Developer, responsible for developing and extending features, fixing bugs, and optimizing system performance.
- Collaborated closely with Business Analysts to analyze requirements, implement new features for Japanese clients, and improve user experience.
- Participated in a web development training program using PHP, Laravel, and Vue.js, practicing both basic and advanced CRUD operations with PHP Core and Laravel.
- Implemented security measures to protect against common web vulnerabilities such as CSRF, XSS, and SQL Injection
- Technologies: Laravel, CodeIgniter, VueJS, MySQL, Socket.IO, Docker.

Education

VNU HCMC-University of Science – Bachelor of Information Technology

2020 – 2024

English

TOEIC - 550

2024 – 2026
