Professional Summary

Software Engineer with nearly 2 years of experience building and maintaining scalable web applications. Strong backend focus with hands-on experience in PHP, JavaScript, and Node.js, working on real-time chat systems and e-commerce platforms. Currently transitioning to Golang for backend development, with a strong interest in building high-performance, scalable systems. Passionate about clean, maintainable code, system performance, and collaborating effectively in cross-functional teams.

Technical Skills

Languages: Golang, PHP, Javascript

Backend: Laravel, NestJS

Frontend: ReactJS, VueJS

Databases: MySQL, Redis

DevOps: Git, Docker

Work Experience

Software Engineer, Miniapp - Ho Chi Minh City

Feb 2025 – Now

- Took responsibility as a Back-end Developer for Zalo Mini App projects, collaborating with the Front-end team to build, scale, and maintain sales-focused features for businesses.
- Developed core functionalities including customizable product options (toppings), the ordering and SMS system for Việt Tiên, the Vihawa sales agent management platform, and public APIs for external data synchronization.
- Implemented promotional features such as “Buy X, Get Y” to support flexible marketing campaigns, and configured Sentry to monitor system activities, logs, and errors for faster debugging.
- Performed daily system log analysis, resolved customer-reported issues promptly, and contributed to improving overall system stability and reducing recurring incidents.
- Technologies: Laravel, NestJS, ReactJS, MySQL, Docker.

Software Engineer, Lampart - Ho Chi Minh City

May 2024 – Jan 2025

- Participated in the development, maintenance, and optimization of multiple internal and commercial web projects for both domestic and international clients, including sales systems, internal chat applications, and project management platforms.
- Took responsibility as a Fullstack Developer, responsible for developing and extending features, fixing bugs, and optimizing system performance.
- Collaborated closely with Business Analysts to analyze requirements, implement new features for Japanese clients, and improve user experience.
- Participated in a web development training program using PHP, Laravel, and Vue.js, practicing both basic and advanced CRUD operations with PHP Core and Laravel.
- Implemented security measures to protect against common web vulnerabilities such as CSRF, XSS, and SQL Injection
- Technologies: Laravel, CodeIgniter, VueJS, MySQL, Socket.IO, Docker.

Intern Network Engineer, KDDI - Ho Chi Minh City

Jul 2023 – Sep 2023

- Supported periodic server maintenance for clients and resolved issues related to network systems, PCs, and servers.
- Ensured task completion from vendors and provided support in case of system incidents.
- Troubleshoot issues involving Cloud services, international voice services, and configuration/testing environments.

Education

VNU HCMC-University of Science – Bachelor of Information Technology

2020 – 2024

English

TOEIC - 550

2024 – 2026
